

Research Studies

Looking for male and female subjects with Amyotrophic Lateral Sclerosis (ALS)

The Rehabilitation Institute of Chicago (RIC) is conducting a research study to determine what changes occur in the muscles of the arm with Amyotrophic Lateral Sclerosis. Participants will be asked to sit in a chair while either relaxing or contracting different muscles of the arm while electrodes monitor the muscle activity.

For additional information, please contact Emily Case at (312) 238-1560 or ecase1@ric.org.

IRB Project #STU00014437

Principal Investigator: Ping Zhou, PhD

The Rehabilitation Institute of Chicago is an academic affiliate of Northwestern University Feinberg School of Medicine

Date Posted: 01.20.12

Participants must meet the following criteria:

- A diagnosis of Amyotrophic Lateral Sclerosis (ALS)

Participants will receive \$40 as compensation.
